🐦 @mayadihno02

Objective

Highly skilled and motivated javascript developer, with over 3 years experience in building scalable and efficient web applications and software solutions using React Js, Node Js and associated technologies. Proficient in developing complex applications using Redux, Next Js, Firebase, Express Js, integrating complex APIs, and other React js ecosystem components. A quick learner with a deep understanding of object-oriented and functional programming principles. A problem solver with strong communication and collaboration skills, able to work effectively in a fast-paced and dynamic environment. I love building software that can help individuals and enterprises to reach their full potential.

Experience

- **Phonix Dev | LAGOS, NIGERIA**   Feb 2024 - May 2024
  Frontend Enginner
  - I contributed to the company's primary platform, focusing on enhancing its investment and wealth creation features. I also worked on a project aimed at expanding accessibility to a broader audience, developing key functionalities to support that mission.

  - During my time there, I developed proficiency in cutting-edge technologies, specializing in React, TypeScript, Next.js, Tailwind CSS, and Material UI. I designed components, optimized code, integrated APIs, and created documentation to support project development and team collaboration.

- **Venture Garden Group | LAGOS, NIGERIA**   Jan 2023 - Dec 2022
  Frontend Enginner
  - In my role, I played a key part in the development, testing, and maintenance of the finance platform, focusing on delivering a seamless user experience. I implemented core features, optimized performance, and improved platform stability, contributing to the overall efficiency and reliability of the system.

  - I played a key role in building a dynamic web application, focusing on developing highly reusable components and integrating complex APIs. I collaborated closely with designers to transform design concepts into pixel-perfect, responsive interfaces. Utilizing modern web technologies such as React, TypeScript, MUI, and Tailwind CSS, I ensured seamless functionality, optimized performance, and a consistent user experience across various devices and browsers.

- **Atoms Technologies | LAGOS, NIGERIA**   May 2022 - Oct 2023
  Frontend Engineer (Freelance)
  - As the sole developer, I undertook a significant role in the development of the website designed to embody the essence of the brand while enlightening potential clients about the diverse range of services offered.

  - My responsibilities involved crafting a user-centric experience that seamlessly blended aesthetic appeal with informative content. This involved thoroughly structuring the layout, selecting appropriate color palettes, and ensuring a coherent flow that guided visitors through the platform.

- **Exact Technologies | LAGOS Nigeria**   Jul 2021 - Dec 2021
  Frontend Engineer (Intern)
  - I collaborated within a dynamic development team, crafting innovative web apps for public use. This joint endeavor not only broadened my technical skills but also equipped me to effectively leverage emerging technologies.

  - I played a crucial role in the development of an all-encompassing online culinary platform, integrating webinars, classrooms, pre-ordering, quizzes, payments, and subscriptions, using React, Redux and CSS.

Education

- **Federal University of Technology Akure**   2018-2023
  (BTech) Industrial Chemistry

Skills

- HTML
- CSS
- Javascript
- Typescript
- React js
- Material UI
- Chakra UI
- Tailwind CSS
- Redux
- React Query
- Axios
- Firebase
- Git and Github
- Mongo Db
- Node js
- Next js
- Express Js
- Prisma
- Notion
- Slack

Projects

- **Maya Beauty**
  Mayabeauty.netlify.app
- **Declutter web shop**
  https://declutter-app.netlify.app/
- **3M Logistics Solution**
  Project Description:Mini e-Commerce website to sell local Africa food in Denmark. Role: Frontend developer Technologies: JavaScript,React js,Material Ui, commerce js,Vanilla Css Link:

  https://umlfoods.netlify.app/

- **Reiki**
  https://miracleapp.netlify.app
- **University of Sunderland Master funolympics**
  Project Description: An online registration system for audiences to gain access to the proposed broadcast platform. The system must allow users to register, login and logout when using it, and make selections of broadcasts they wish to watch. Role: Frontend developer Technologies: JavaScript,React js,Chakra ui, Firebase,Vanilla Css Link:

  https://funolympic.netlify.app/

- **Finbarn export company**
  Project Description: platform for checking available goods before exporting the farm products and agricultural commodities to Barcelona Spain. Role: Frontend developer Technologies: JavaScript,React js,Chakra Ui,Vanilla Css Link:

  https://Finbarn.com

- **Cryptoverse**
  https://mycryptosite.netlify.app
- **Tel medicine**
  Tele-med.netlify.app
